10	User Manual	1			

1.3.Specifications

Suitable for Models	HL-SDL01	Doors Applicable	Aluminum door Wooden door
Materials	Panel：Stainless steel Handle：Aluminum alloy	Working Voltage	6V/4x AA Batteries
Lock Weight	2.5 KG	Door Thickness to Fit	35-60mm
Unlocking Way	WIFI Fingerprint(option) Password Card Mechanical key	Data Capacity	Fingerprint+Password+Card ≤180 （Fingerprint≤100）
Color	Silver Black	Working Temperature	-10℃-55℃
Low Wattage Alarm	Less than 4.8V	Working Humidity	0-95%

1.4.Electronic Locking Button

Locked

Unlock

When the button is pulled to the "red" status, the lock is set to the "Locked" state. In this state, the lock can only be opened from the outside by using the Master Admin access method. Any other unlock methods will trigger a voice prompt saying "the lock is locked" when attempting to unlock.
To disable this function and release the "Locked" state, you need to pull the button to the "green" status. This action will allow the lock to be unlocked using other authorized methods without triggering the voice prompt.
2.Installation

2.1Turn the handle

Notice: Adjust the handle according to the direction you open the door.

For Front Panel:
1. Loosen the screws

2.Left Open the Handle Toword the Left;

Log In

Sign Up

Try now

1.Click "Sign Up"and read the Privacy Policy after it pops up. Click "Agree" and enter the registeration page.

2.You can use email or mobile number as your account to register. The country/region of the APP will be the same as the phone's. You can also change it by yourself when registering. （You cannot change the country/region after the registeration). Enter mobile number/email and click"Get Verification Code"；

3.Enter the verification code and turn to the password setting page. Set your password as required and click "Done".

4.3.Log in

If you already have an account,choose "Register with Existing Account"and enter the log in page.

1）.The system will automatically locate the current country/region you are in. Or you can choose the country/region by yourself.

2）.Enter mobile number/ email and password.

-Thirdy-party Social Account Log in

If you have downloaded Wechat on your phone, you can click the Wechat icon in the log in page. You can log in using your wechat account after authorizing it.If you are using iPhone,you can also log in with Apple ID.

# 4.4.Using the APP

4.4.1. Add Lock

1. Tap Add Device on the Home page or + in the upper right corner of the page to go to the Add Device page. Currently, you can manually add devices or search for devices to add to the app.

Attention：You should be add admin first!!!

① :After pressing "2" + "#" to verify the administrator, enter the Network config , The numbers starts flashing

② As shown in the figure, the mobile app connects the lock. Select the wifi door lock, enter the wifi password and connect the door lock(It can only connect to 2.4G   WiFi)

③ Adding success: the voice prompt "successful"

④   Adding Failure: The keyboard light No. 5 on the keyboard is not lit, and the timeout voice prompt "failed"
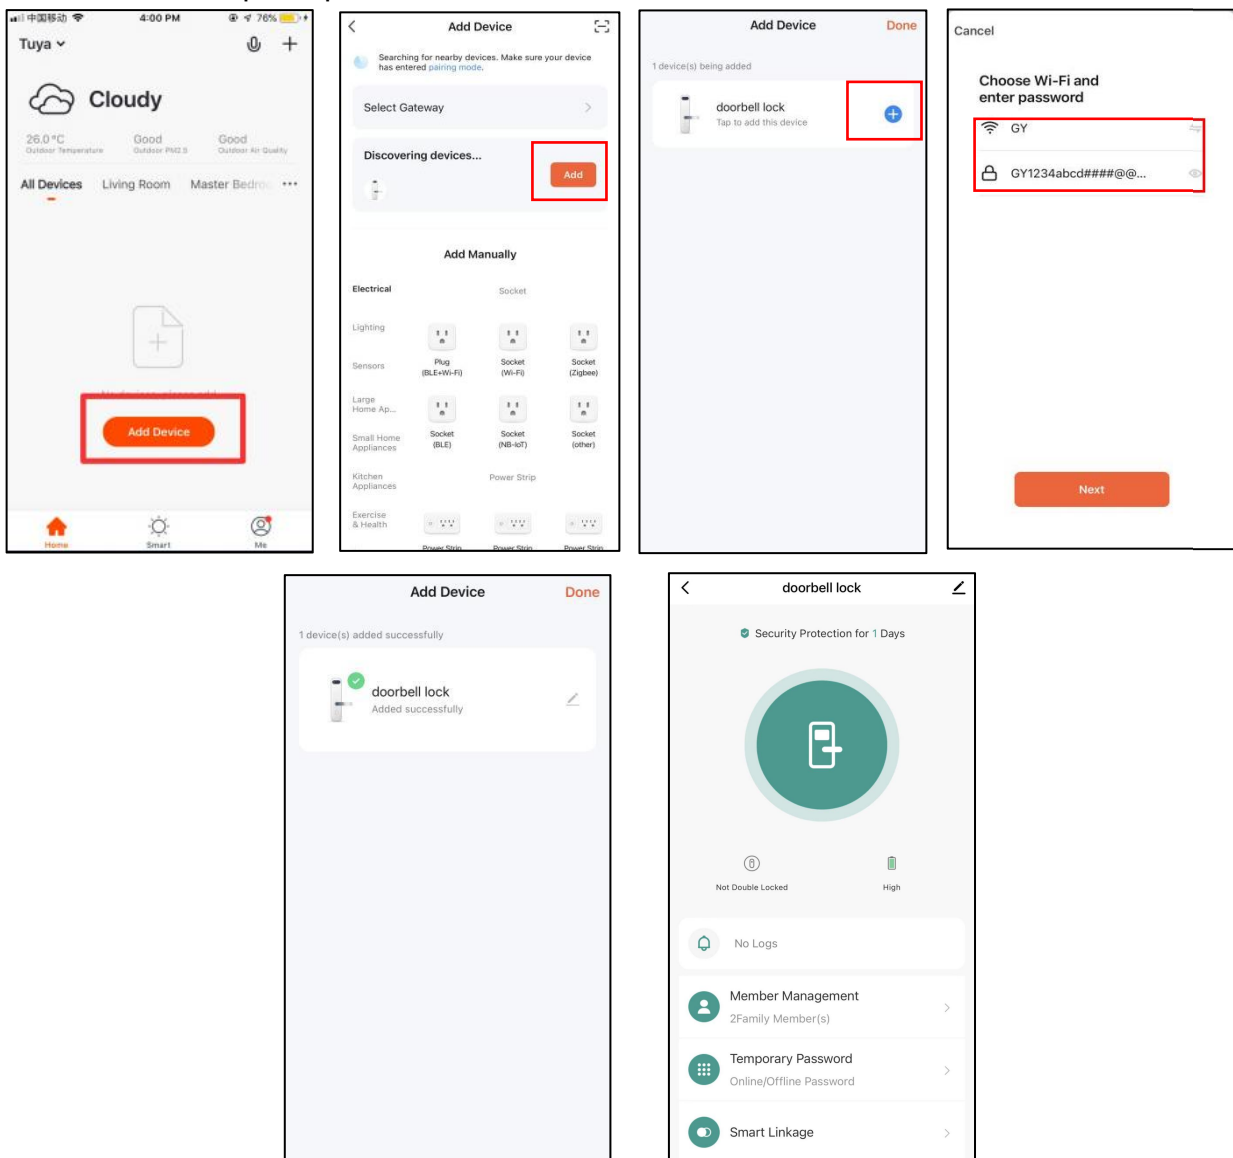

4.4.2. Remote unlock
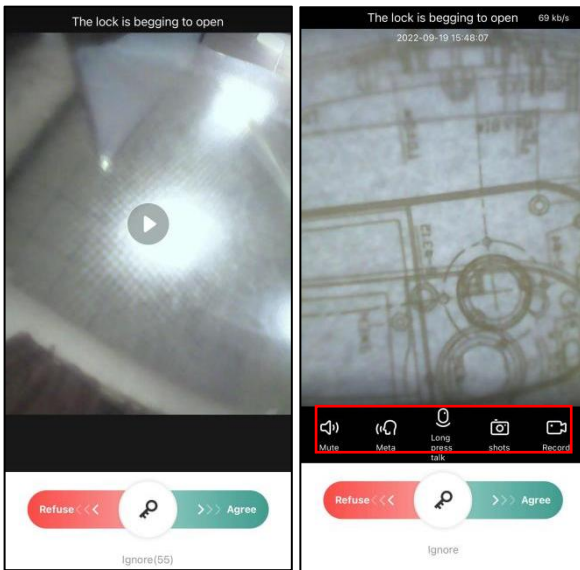

1.Tap on the homepage of the mobile app to access the corresponding page for the smart lock.

2.Press the "#" key on the smart lock keypad to request remote unlock.

3.The mobile app will receive the unlock request, and swipe to unlock.

4.If a video request is received, you can choose to view the real-time video by tapping the play button or simply swipe to unlock.

5.Real-time video intercom is available, and features like Mute, Zoom, Capture, and Record can be utilized during the video call.

6.Enjoy 30 free video calls per month.

7.Video calls will automatically disconnect after one minute.

4.4.3.Online Password Function
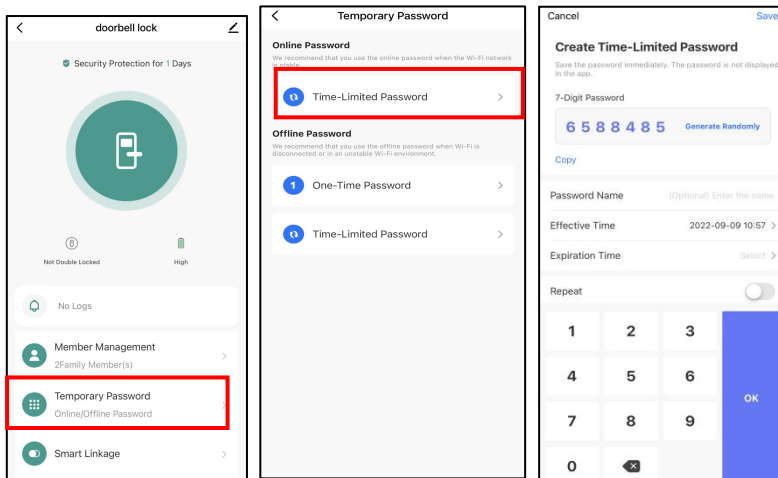

When a visitor arrives at your office or home, you have the option to generate a temporary password with a specified validity period. Follow the steps below to perform this operation.
Additionally, you can view the unlock records in the mobile app window.
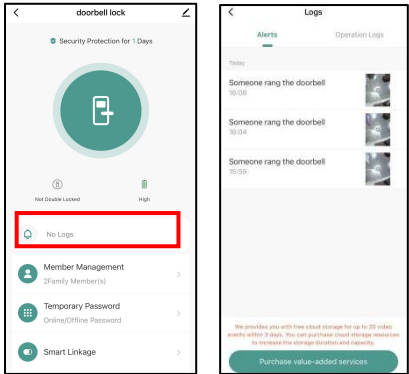

4.4.4.Offline Password Function
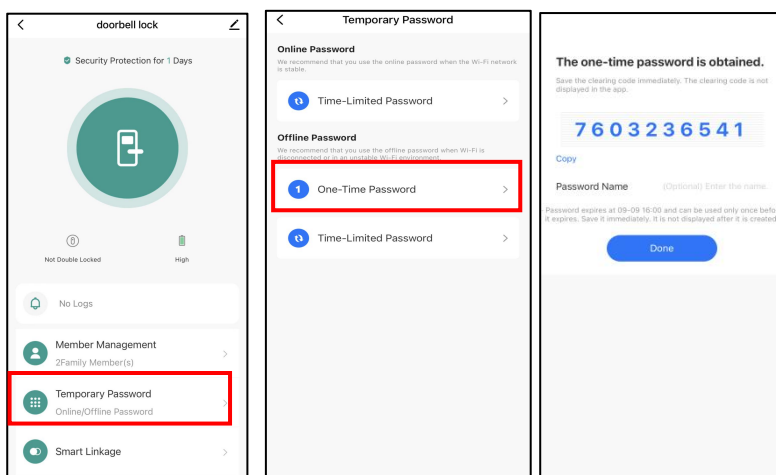

There are two types of offline passwords available: one-time password and time-limited password.

A one-time password will only remain valid for 6 hours, and a time-limited password will remain valid for 24 hours.
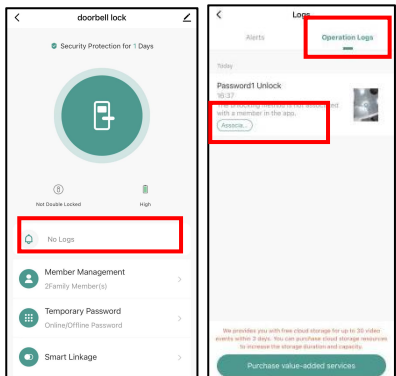

4.4.5.Alarm

1. Automatically generate reports when an alarm is triggered. These reports can include the following types: doorbell call, tamper-proof alarm, low-voltage alarm, and validation error alert.
2. When the doorbell is triggered, you have the option to view a brief video associated with the event.

4.4.6.Record

Upon opening the door, an opening record will be generated and reported. If the opening method has not been previously linked or associated with a user, you can simply click to bind the user to the opening method.

1. To edit the opening information of a user, simply click on the user's profile that has been added. From there, you can make changes to the corresponding user's opening details.

2. The lock and the mobile app are synchronized through cloud information. To bind the lock opening information to a user's name, select the lock opening information that has already been synchronized to the cloud and associate it with the user. This way, when the user opens the lock, the app's opening record will display the lock opening event associated with that user. However, please note that if the user's information is deleted within the app, the user will still be able to open the door. To prevent access, the user's information must be deleted directly from the lock itself.

5.FAQ

1) How to read operation records?	In the Records of the main interface. .
2) Why can't I unlock it after open the passage mode	You need to perform an unlock verification in any method, than the passage mode will take effect.
3) What is the purpose of Auto Lock	You can set how long to lock after unlocking
4）After installation, touch sensing keyboard, screen no respond	a) In this case, first check that the positive and negative electrodes of the battery have been installed upside down, whether the battery has enough power b) Remove the back panel and see if it's connected. c) To eliminate the above situation, you need to remove the lock ,check whether the wires of the lock body are squeezed, and the re-wire.
5）Unable to register fingerprint	Check the fingers for dirt or wear, check the fingerprint head on the lock for dirt and oil stains, etc. Check to see if the fingerprint is working properly(Press to see if there is any responds.
6）What is the reason why the smart lock consumes fast power?	a) Large standby power consumption b) Short circuit
7）There is no response to pressing the handle on outside the door, and there is unlock normally on inside the door, but the verification is normal, and the motor is normal.	It may be the triangle direction on the clutch was error, please check correction.
8）How many times will the password be locked? How long is it locked?	Enter the wrong password more than 5 times in a row, the keyboard is locked for 90 seconds
