

Zigbee Motor Instruction

1. Technique Specifications

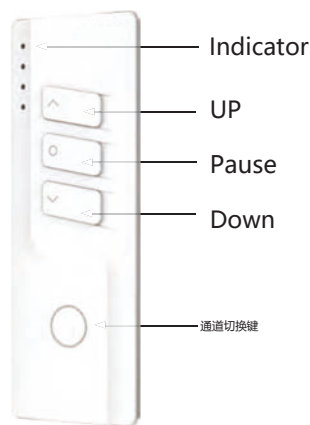

POWER	230V/50Hz	The motor can be compatible with 15 emitters at most The motor will cut off the power after working for 4 mins continuously
Protection Index	IP44	
Loaded Power	< 400w	

2. Product Appearance

Single Channel

Four Channels

3. Technique Data

POWER	3V	Currenty	≤12mA
Working Temperature	-10°C to +60°C (LCD emitter)	Code	Rolling Code
Working Temperature	-20°C to +60°C (Non- LCD emitter)	Frequency	433.92MHz
